Introducing Delara®

The versatile mid-class tooth line with lifelike aesthetics.

Giving a hand to oral health.

KULZER
MITSUI CHEMICALS GROUP

Delara: at the heart of the PALA family of teeth.

Reliable and versatile, Delara is a vital component of a dental technician's tool kit. With vibrant aesthetics and an excellent price-to-performance ratio, it's a perfect choice for use in partial and full dental prostheses.

Delara is available in:

- 18 upper and 5 lower **anterior moulds**, 4 upper and 4 lower **posterior moulds** with 20° angulation
- **18 vibrant shades** (VITA A1-D4 plus bleach shades BL2 & BL3)

Form, function and aesthetics.

Designed **by dental technicians, for dental technicians** using INCOMP and CAD/CAM technology, Delara offers these advantages:

Beautiful, Lifelike Aesthetics

- Modern, bright shading with 3 layer anteriors
- Dynamic light refraction
- Vivid, enhanced surface structure
- Anatomical forms

Easy Handling for Enhanced Productivity

- Polishing buffer
- Basal grinding reserve
- Optimized incisal edges
- Retains shape and layering even after grinding

Versatility

- Optimized portfolio of shades and moulds with full range of options
- Various setup possibilities (tooth-to-tooth to cross bite)
- CAD/CAM production for easy integration into digital workflows

Value and Performance

- Excellent functionality with Kulzer quality and durability
- Great price-to-performance ratio for mid-priced segment
